

CB Antenna MIDLAND LC59 length 74cm Code C1019 with magnetic base and cable

Large power and wide band CB antenna for vehicles, is easy to install due to magnetic base mounting.

Installation and assembly:

1. You must connect the antenna to the magnetic base of the package. The antenna is preferably mounted in the center of the car dome.
2. After connecting, mount the antenna and fix the antenna with the included key.
3. Connect the antenna to a CB radio and test the SWR in an open area using a device called a reflectometer.
4. The antenna is calibrated by lifting or lowering the wire to obtain an optimal SWR value.

Technical specifications

Frequency	26.8 - 27.6 MHz
Maximum power applied	150 W at the top
Gain	3 dB
Magnetic base diameter	78 mm
Length	74 cm
