

hi-Zip are earbuds that look like a zipper and provide the ultimate audio quality, an unconventional design and, above all, avoid knots in the cables while carrying them in your pocket.

hi-Zip exploits the sophisticated BBS technology (Bass Boost System) improving the sound quality of your music while emphasizing the basses and isolating sounds from outside noises. You can use hi-Zip for listening to the songs you love simply by connecting it to your media devices (MP3 player, smartphone, tablet...) via the universal 3.5mm jack. Thanks to the original zip design, the cables of hi-Zip will not form any more knots.

Specifications:

- Headphone Type: supra-aural
- Frequency Response: 20Hz - 20KHz
- Jack plug: 3.5 mm stereo jack
- Nominal Impedance: 32 Ω
- Sound pressure level (SPL): 105 dB
