Data Transparency Information

Regulation (EU) 2023/2854 of the European Parliament and of the Council of 13 December 2023 (Data Act) - Article 3
PNI SmartHome WP800 - Wi-Fi Smart Socket

Brand	PNI	SKU	PNI-WP800
ASIN	B08HKWBM7S	Product type	Wi-Fi smart socket
Manufacturer / Data Holder	S.C. ONLINESHOP S.R.L.	Related service	Tuya Smart
Connectivity	Wi-Fi 2.4 GHz	Data processor	Tuya

This notice provides pre-contract transparency information concerning data generated by the connected product and its related service. ONLINESHOP S.R.L., as the Tuya OEM/customer associated with this product, acts as the data holder for the purposes described here; Tuya provides the related cloud platform as data processor.

1. Data generated by the connected product

During normal use, the product is capable of generating operational and technical data associated with its connection and use. This may include device identification information, online/offline status, activation information, firmware information, device status, switching events, configuration commands and associated timestamps. The statement intentionally does not claim product-specific energy-consumption measurements because these have not been verified for this model.

2. Data format, volume and generation frequency

The connected-product data is handled as structured key-value data / device Data Points (DPs). For a smart plug, the expected volume is low and may be in the order of a few kilobytes per day, depending on usage and the frequency of status changes or commands. Data may be generated in real time, continuously while the device is online, and/or when events or user actions occur.

3. Storage and retention

Device Data Point (DP) data is stored on cloud servers used by the Tuya platform. For this PNI product, ONLINESHOP S.R.L. uses Tuya's standard retention arrangement: DP data is retained for 7 days by default and is then automatically deleted in accordance with the platform retention mechanism. No extended DP storage service is used for this product.

4. User access and data export

Users can access and request export of available device data through the Tuya application functionality. Tuya documents the following path for supported app versions: Me > Settings > Privacy Policy Management > Device Data Export > Select device. The user can preview available device data and request an export, including delivery to an email address where offered by the application. Availability and wording of these controls may depend on the current app version.

5. Data deletion

Users can delete associated device data through the controls provided by the related service. Tuya documents deletion when unbinding/removing a device by selecting the option to delete data. The exact wording of the control may vary with the current application version.

6. Data holder and related service provider

Data holder: S.C. ONLINESHOP S.R.L. (PNI), Romania.

Related service / cloud platform: Tuya Smart.

Data processor: Tuya. Tuya processes connected-product data through its platform on behalf of its OEM/customer in accordance with the applicable service arrangements.

7. Data sharing and security

Where applicable and at the user's request, data may be made available to a third party in accordance with the EU Data Act and the functionality provided by the related service. Tuya states that data in transit is protected using TLS 1.2/1.3 and data at rest is protected using AES-256 encryption.

8. Important scope note

This transparency statement is based on the verified product characteristics of PNI SmartHome WP800 and the applicable Tuya connected-product data framework. It describes categories of operational data without asserting unverified model-specific Data Points. Privacy-related personal data processing remains subject to the applicable privacy notices and data-protection law in addition to the EU Data Act.

Manufacturer / Data Holder
S.C. ONLINESHOP S.R.L.
Olteniei Street 26A
Piatra Neamt, Neamt County 610206
Romania
Brand: PNI
