Tuya Smart App

Download the **Tuya Smart** app by accessing Google Play or the App Store or scan the QR codes below:

Android

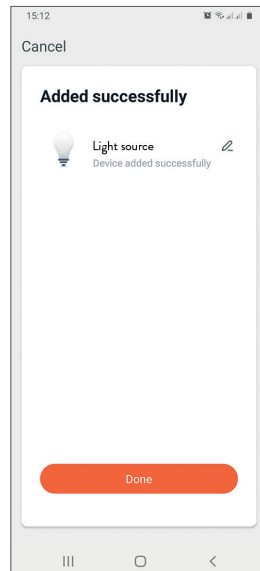

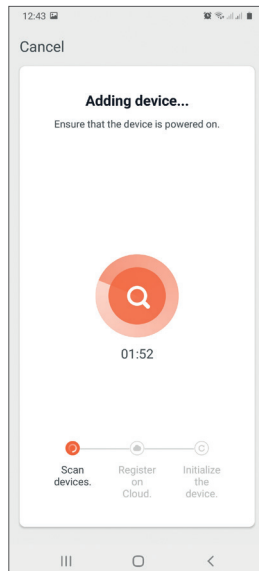

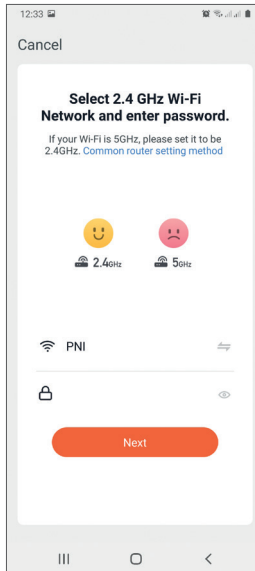

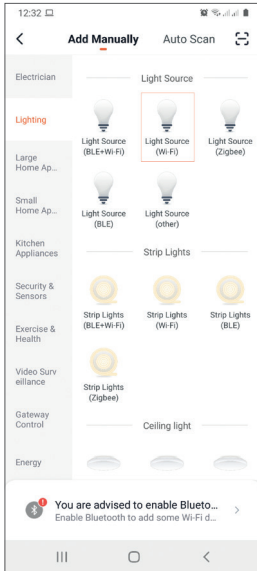

iOS

Add device in Tuya Smart application

1. Open the application, create an account and log in.
2. Add your device by clicking the + icon in the upper right corner of the screen or by clicking the **Add device** button (this button only appears when you do not have any devices added to the application).
3. Select the **Lighting** option on the left side of the screen.
4. From the list of devices on the right side of the screen, select **Light Source (Wi-Fi)** .
5. Select the WiFi network you want to connect to and add the password. Activate the GPS location on your phone to continue.
6. In the next interface, in the upper right corner, select the **EZ Mode option**.
7. Reset the device following the instructions in the application. Turn the spot on and off three times in a row, leaving it in the on position at the end. If the bulb flashes quickly, then it is in pairing mode.
8. Check the **Confirm indicator rapidly blinks** and click **Next**.
9. Check the Confirm indicator rapidly blinks option and click Next.

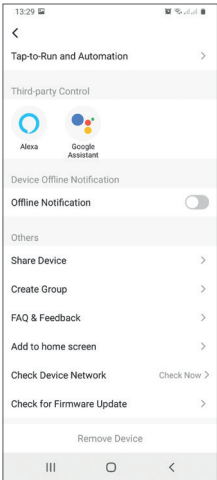

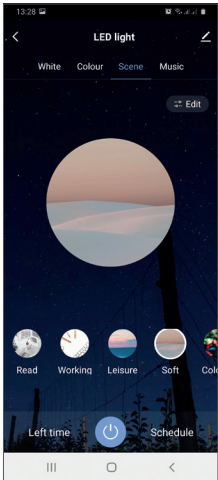

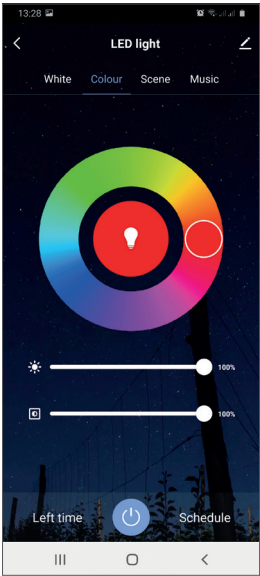

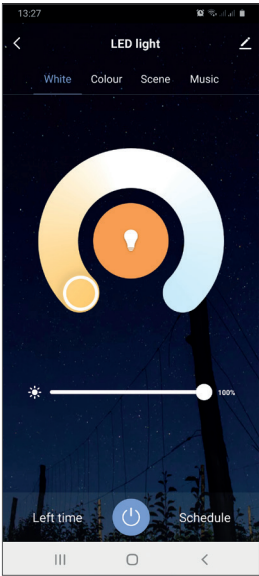

10. The application will scan nearby devices. After identifying your device, you will receive the **Added Success** confirmation. In this window you can change the name of the device..
11. To finish, click the **Done** button.

Device control from application

Select your smart spot from the list of devices added to the application and choose the desired command:

- Turn the light bulb on and off
- Change the light (hot or cold)
- Choose light color (RGB)
- Choose a predefined scenario
- Share the device etc.

Specifications

Socket	Connection clamps
Color	RGB + W(16 milion colors)
Connection	IEEE 802.11 b/n/g 2.4G Hz
Smartphone app	Tuya Smart / SmartLife (Android / iOS)
Dimensions	Ø 115mm x 65mm

Aplicatia Tuya Smart

Descarcati aplicatia **Tuya Smart** accesand Google Play sau App Store sau scanati codurile QR de mai jos:

Android

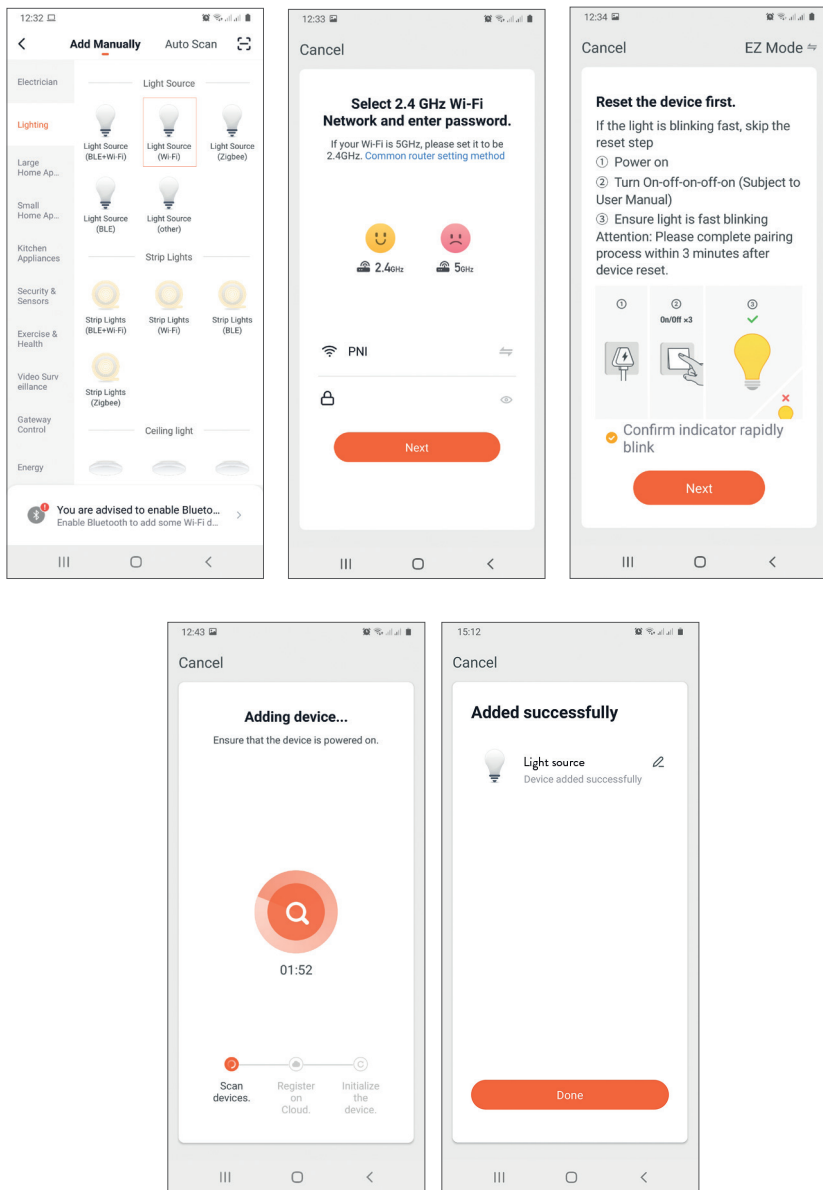

iOS

Adaugare dispozitiv in aplicatia Tuya Smart

1. Deschideti aplicatia, creati-va cont si autentificati-va.
2. Adaugati dispozitivul dvs. apasand pictograma **+** din coltul dreapta sus al ecranului sau apasand butonul **Add device** (acest buton apare doar atunci cand nu aveti nici un dispozitiv adaugat in aplicatie).
3. Selectati din partea stanga a ecranului optiunea **Lighting**.
4. Din lista de dispozitive din partea dreapta a ecranului, selectati **Light Source (Wi-Fi)** .
5. Selectati reseaua WiFi la care doriti sa va conectati si adaugati parola. Activati locatia GPS din telefon pentru a continua.
6. In interfata urmatoare, din coltul dreapta sus, selectati optiunea **EZ Mode**.
7. Resetati dispozitivul urmand instructiunile din aplicatie. Aprindeti si stingeti spotul de trei ori consecutiv, lasandu-l la final pe pozitia aprins. Daca becul clipeste rapid, atunci acesta se afla in modul de imperechere.
8. Bifati optiunea **Confirm indicator rapidly blinks** si faceti click pe **Next**.
9. Aplicatia va scana dispozitivele din apropiere. Dupa ce va identifica dispozitivul dvs., veti primi confirmarea **Added successfully**. In aceasta fereastra puteti modifica denumirea dispozitivului.

10. Pentru a finaliza, faceti click pe butonul **Done**.

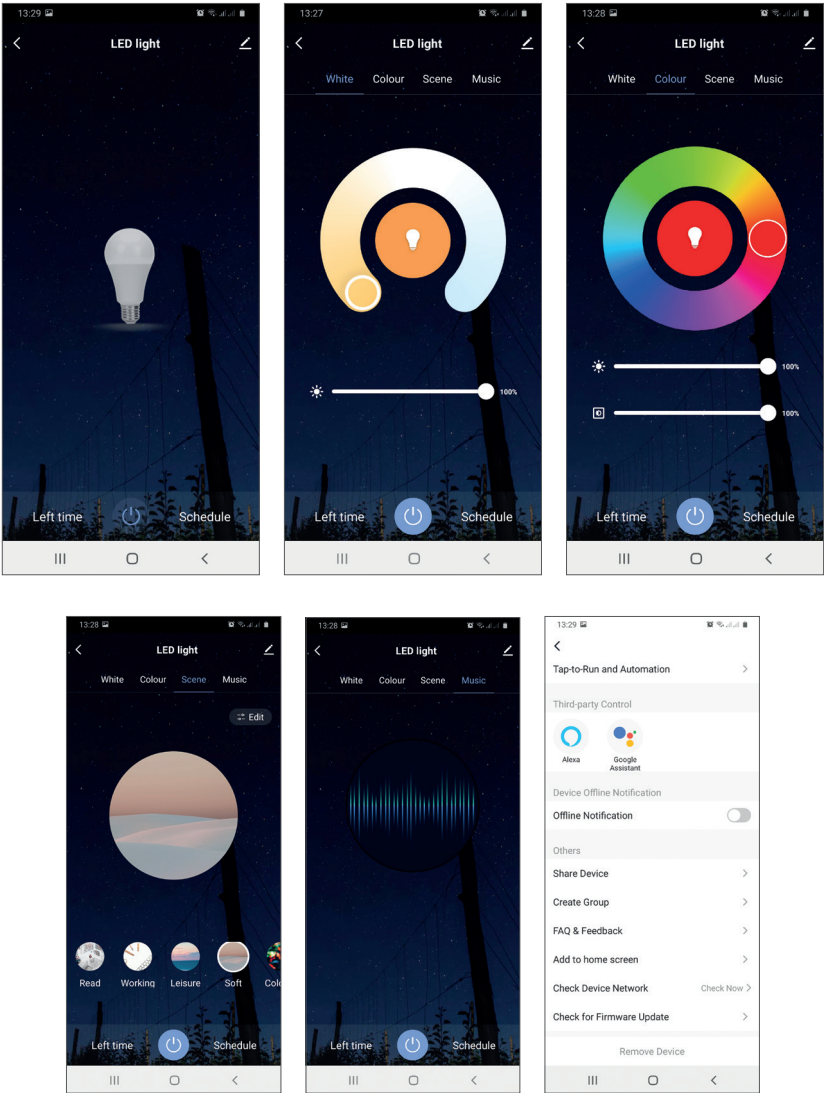

Control dispozitiv din aplicatie

Selectati din lista de dispozitive adaugate in aplicatie spotul dvs. inteligent si alegeti comanda dorita:

- Aprindeti si stingeti becul

- Schimbati lumina (calda sau rece)
- Alegeti culoarea luminii (RGB)
- Alegeti un scenariu predefinit
- Partajati dispozitivul etc.
