8. Please do not use any accessories that are not provided by the original manufacturer. We are only responsible for the performance and safety of the officially designated accessories.

9

### FAQ

Q. How often does pet fountain change the water and how often we need to clean it?  
A. According to the water quality and pet drinking habits. It is recommended to replace or add water every 2-3 days; it is recommended to clean at least once a week (including water tank, top cover, filter slot, filter ), and completely change the water to prevent fouling from clogging the filter slot, resulting in abnormal water quality  
Do not use hot water or boiling water when cleaning.

Q. What kinds of water should be used in the pet fountain?  
A. It is recommended to use pure water or mineral water.

Q. How often does filter need to be replaced?  
A. The filter is recommended to be replaced once a month to maintain a good filter effect.

Q. Does the pet fountain consume lots of power? is there any noise?  
A. It has low working power (MAX4.5W) and consumes about 1 kWh in 10 days.  
The product adopts silent pump and noise reduction design, working without noise. (There is natural water sounds to attract pets to drink plenty of water.)

Q. Is there any safety hazard when the power cable of the pet fountain is bitten by a pet?  
A. The power supply adopts 5V low voltage and 0.6A low current to ensure the safety of pets. Friendly reminder: use broken power cable will have a hazards of pets eating, please replace it in time.

Q. What are the most suitable cats and dogs for pet fountain?  
A. Suitable for adult cats and small and medium dogs.

Q:What is the reason that the pet fountain does not work after it is powered on?
