NL	Handleiding	28
PL	Instrukcja obsługi	29
R	Manual de utilizare	30

## Main functions

- Simultaneous recording in real time on several channels, remote playback and configuration from PC and Smartphone applications.
- Simultaneous video output on VGA and HDMI.
- Backup on USB stick and external HDD.
- Supports human shape detection and PTZ control (depending on the camera)
- Possibility of connecting an external microphone and external speaker.
- Intelligent AI functions
  - E-fence – push connection, large screen, NVR voice alarm and other alarm functions (function available only with compatible camera)
  - Line-crossing - push connection, large screen, NVR voice alarm and other alarm functions (function available only with compatible camera)
  - Duty-off detection - push connection, large screen, NVR voice alarm and other alarm functions (function available only with compatible camera)
  - Passenger flow statistics - supports passenger flow query (function available only with compatible camera)
  - AI playback - Supports human AI playback, etc. in which the playback is more accurate.

## Technical specifications

Number of channels	4 / 8 / 10 / 16 IP
Registration resolution	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Playback resolution	Max. 4K on HDMI output Max. 1080P on VGA output Max. 16Ch, supports dual stream
Video outputs	1 x VGA / 1 x HDMI
Audio output	1 x jack 3.5”

Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Video compression	H.264 / H.265
Audio compression	G.711U G.711A G.726
Registration modes	Manual, intelligent, motion detection, programmed
HDD	1 x HDD SATA (max. 8TB), not included
Camera protocol	P6S, ONVIF
Power supply	12V / 2A
Consumption	<15W (without the HDD)
Dimensions	255 x 210 x 40 mm

## Instructions for use

### Installation of the storage unit

Before the first use, please install the storage unit.

A SATA hard disk with a maximum capacity of 8TB can be installed in the housing of the recording unit (the HDD is not included in the package).

- Loosen the screws and remove the DVR cover
- Connect the data cables and fix the hard disk in the screws inside
- Put the DVR cover back
- Connect the power cable, internet, mouse and monitor to the DVR

### Turn the NVR on

Insert the power cable into a 230V socket. The DVR will start. The "PWR" indicator LED will turn green.

The Quick Setup Guide will appear on the screen to help you make quick system settings for minimal operation.

Notes:

1. Check if the input voltage corresponds to the recommended voltage of the

device. The supply voltage is 230V±10% / 50 Hz 2A.

2. We suggest you use a UPS device to protect the device from voltage variations and for autonomy during short power interruptions from the supplier.

Attention: voltage variations in the network caused by electric discharges, overvoltages, etc. can lead to the failure of the defective power source that is not covered by the warranty.

## **Turn the NVR off**

There are two methods of turning off the device.

1. Recommended: Press the "Power" button in the upper right corner and select the "Shutdown" option
2. Turn off the power supply.

## **Remote control**

The DVR can be controlled locally or remotely from both smartphones and computers with Windows operating system.

Compatible applications: P6Slite (Android/iOS), EasyVMS (Windows)

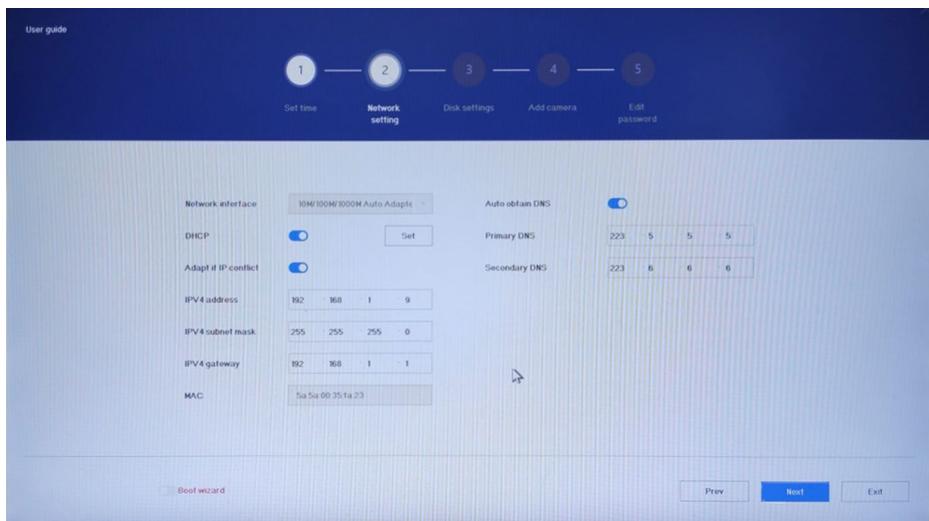

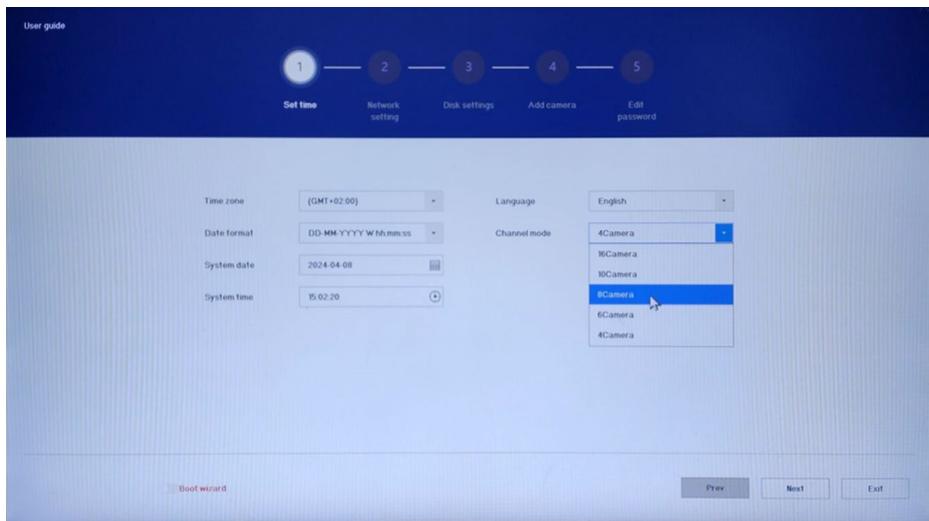

## **Quick configuration**

After turning on the device, the quick setup guide will start.

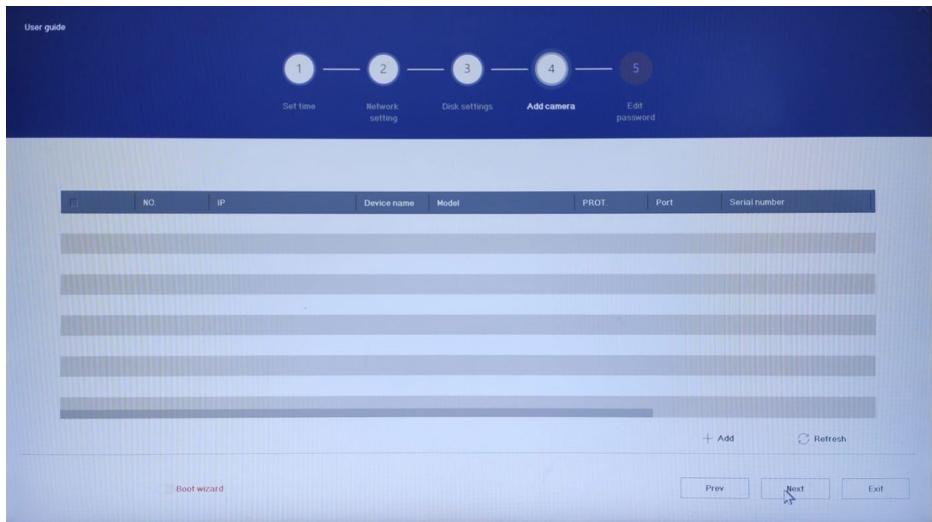

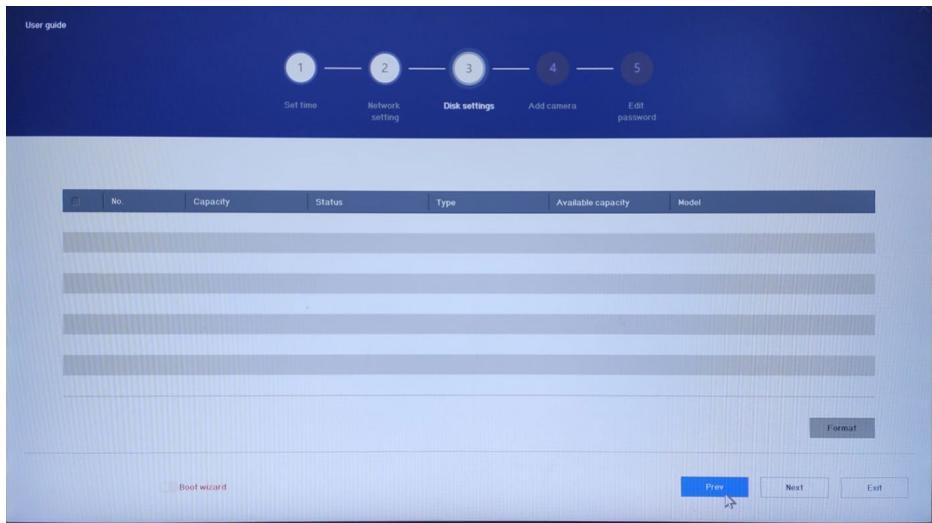

Note: We recommend configuring the system before installing the DVR and cameras in the final location.

Steps to follow from the quick installation guide:

1. Set the time, date, time zone, language and number of cameras to be installed.
2. Check/modify the network settings according to your network, or check DHCP, Adapt if IP conflict and Auto-obtain DNS to retrieve automatic settings from the router.

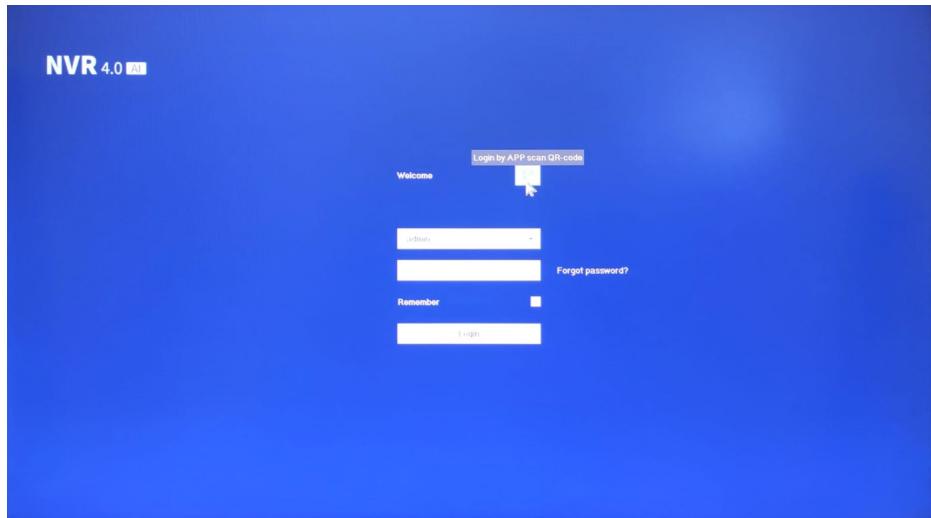

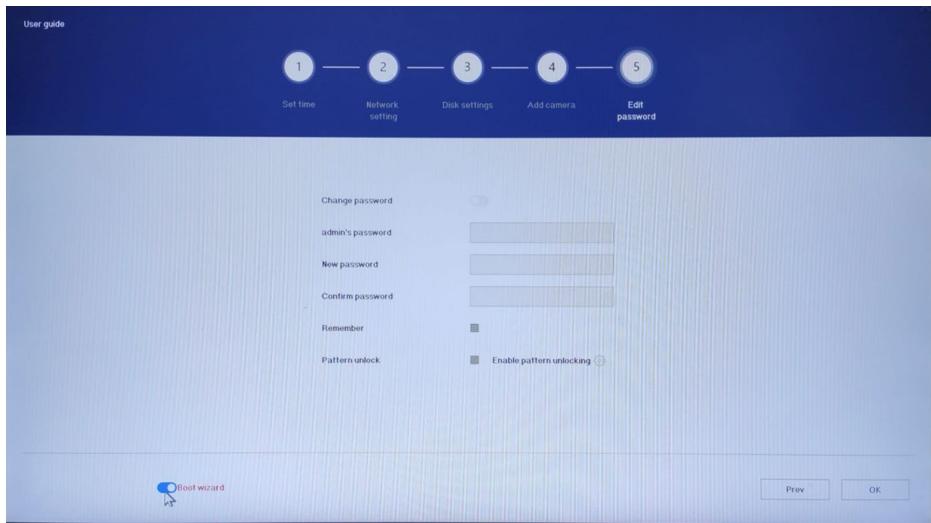

1. If you have installed a storage unit (HDD) in the NVR, the model and capacity will appear in this menu (we only recommend dedicated devices for surveillance systems and for 24/7 operation)
2. This menu is dedicated to adding connected IP cameras (and powered according to the indications) in the same network as the NVR. Here you can update and/or add the list of rooms from the same network.

1. This last step of the quick guide will ask you to change the NVR's factory password to your own private one. This must be 8-16 characters, at least one capital letter and at least one number. From this menu you can also activate a drawing password.

Note: For the security of your system, we recommend changing the password after the first login into the system and writing this password separately in an address book or safe place to avoid forgetting it.

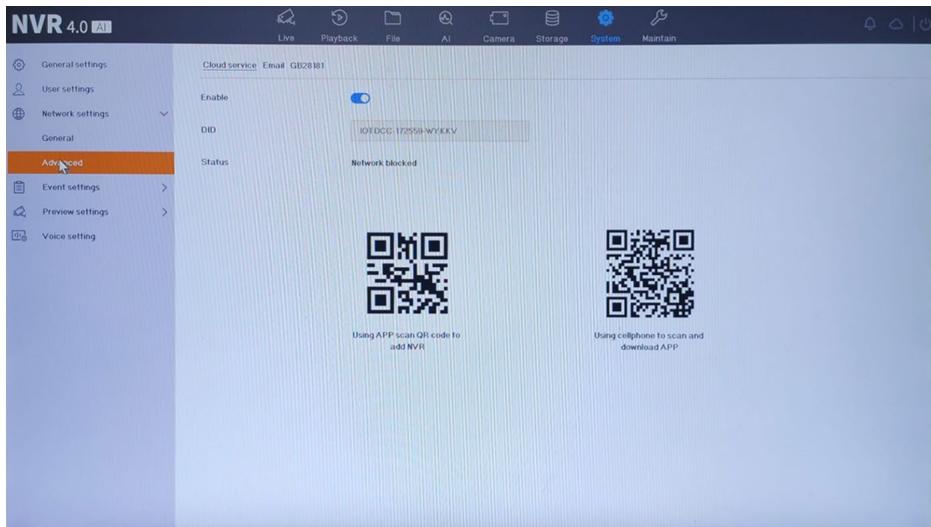

## Network testing

To check the connection to the network/server you can check in 2 ways:

1. System/Network settings / Advanced where in the Status submenu you will find:
  - Internet ready, support alarm notifications - Internet connection successful;

## "Network blocked" - Network/internet unavailable

Check

Service	Status	Reason
Network status	Normal	Good connection
Gateway	Normal	Connected
Primary DNS	Normal	Connected
E-mail	Disable	---
Cloud service	Normal	Internet ready, support alarm notifications
Upgrade from cloud	Normal	Connected
Share cellphone's internet	Disable	---

If the message displays "Network blocked" or "Connect failed" check:

- network cable - functionality
- the port in the router/switch where you inserted the cable if it has internet access
- if the network settings in the System/Network settings/General menu are correct.
- Check "DHCP", "Adapt if IP conflict" and "Auto obtain DNS", apply the settings and check the connection status again.

## The menu

### Live menu

This menu allows 2 main actions

1. "Camera" - Real-time viewing of the images transmitted by the cameras depending on the need: 1/4/9/10/16 channels, full or reduced screen, navigation between cameras. Also here you can make settings on recording control.

1. "Event" - Searching and accessing the list of recorded events according to the AI settings made in the dedicated menu: humanoid detection, electronic fence, Cross-boundary, Off-duty detection

As secondary functions on each individual channel we find: "Quick playback", "PTZ Control", "Zoom", "Sound control", "Camera information", "Bidirectional sound", "Snapshot", "Camera information"

## Playback

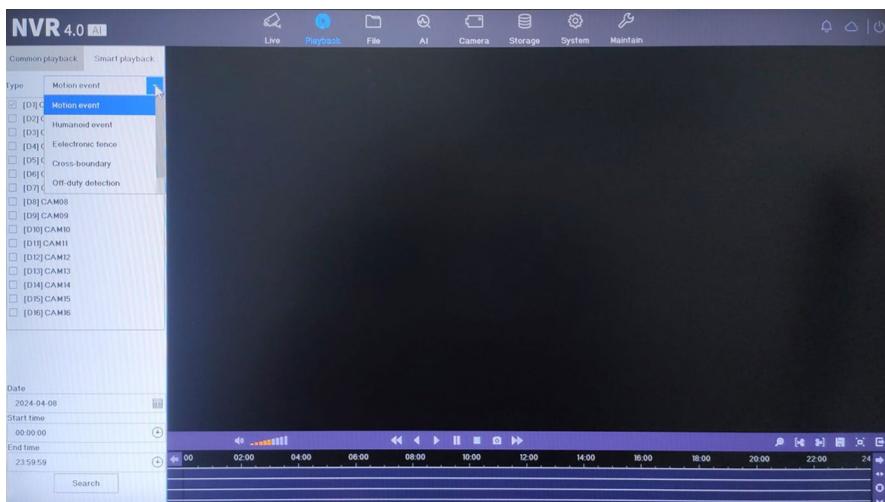

This menu allows 2 main actions

1. "Common playback" - This menu allows the classic playback of recordings according to the searches performed by camera and date: Year, Month, week, day

1. "Smart playback" - This menu allows searching and intelligent playback of recordings according to the searches performed by camera and type of event: Motion event, Humanoid event, Electronic fence, Cross-boundary, Off-duty detection, Passenger flow

In addition to these main actions, we also have secondary playback/navigation actions on the selected video clips.

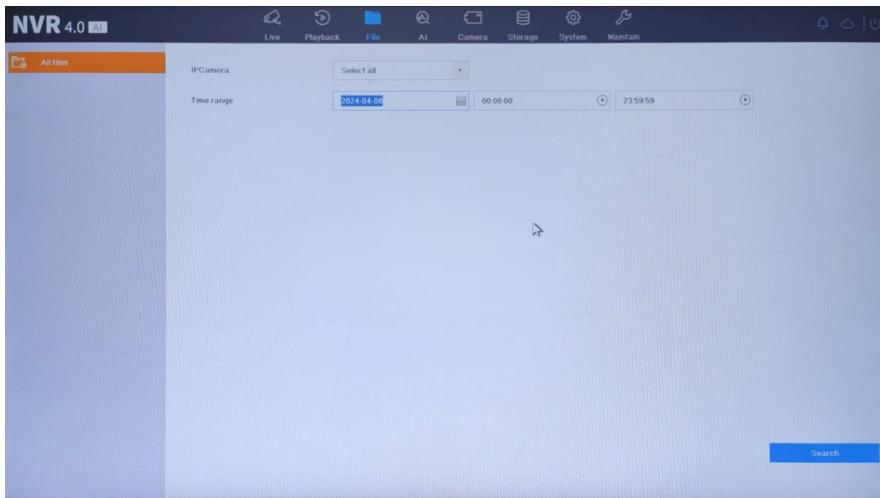

Another important function that can be found in this menu is that of "Backup"  
- saving recordings on an external storage medium (Stick or external USB Hdd)

## File menu

This menu allows you to search for video recordings / photos according to the selected period: Start date - End date.

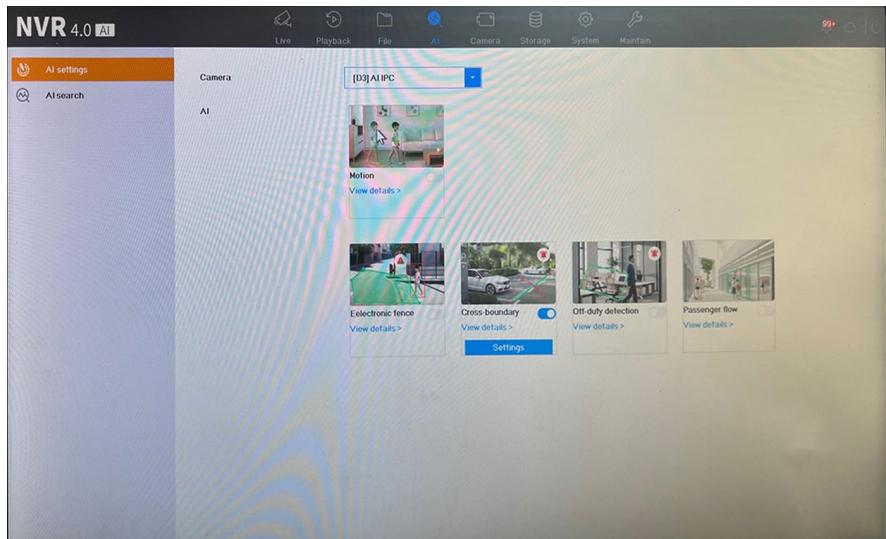

And this menu allows you to save the selected recordings on an external storage device.

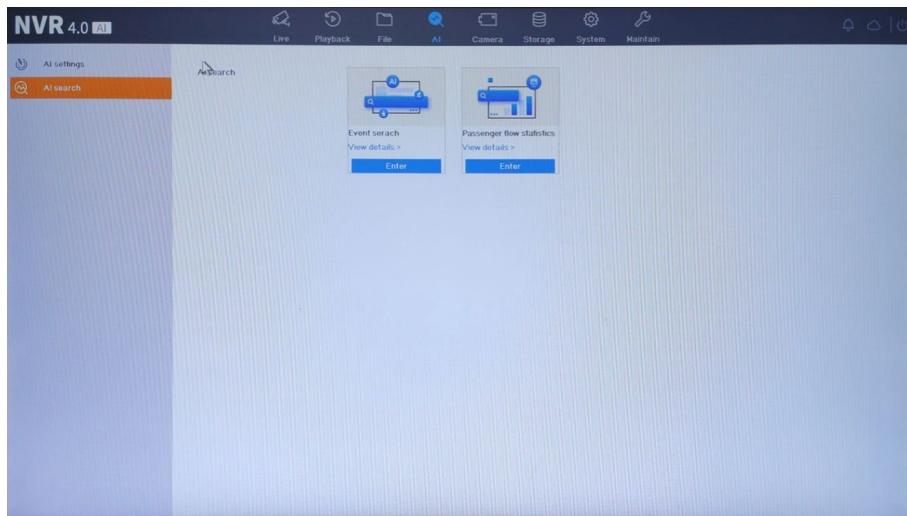

## AI menu

This menu allows 2 main actions

1. "AI settings" – This menu allows action settings for the different types of AI events (only if that camera supports these functions)

"AI search" – This menu allows advanced searches based on AI events

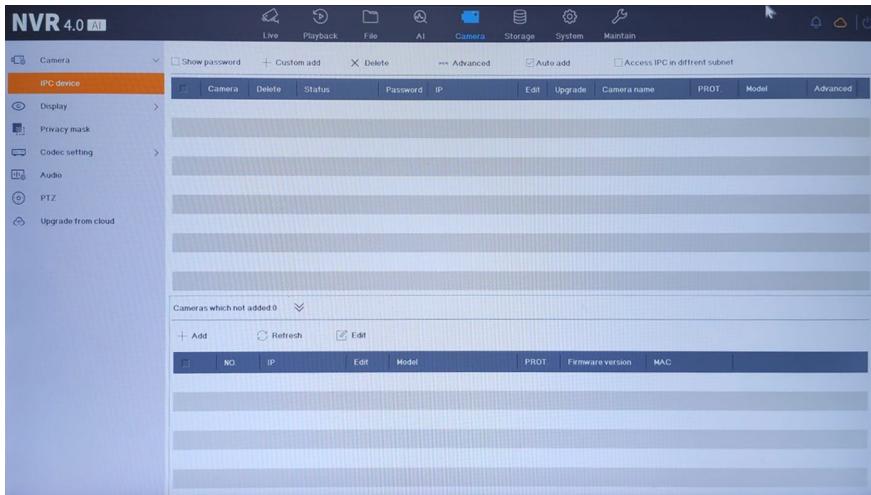

## Camera menu

Acest meniu permite accesul la 7 submeniuri cu setari ale camerelor:

1. "Camera" – This submenu provides access to the IPC camera management

part: Add, configure, delete, etc. (if available)

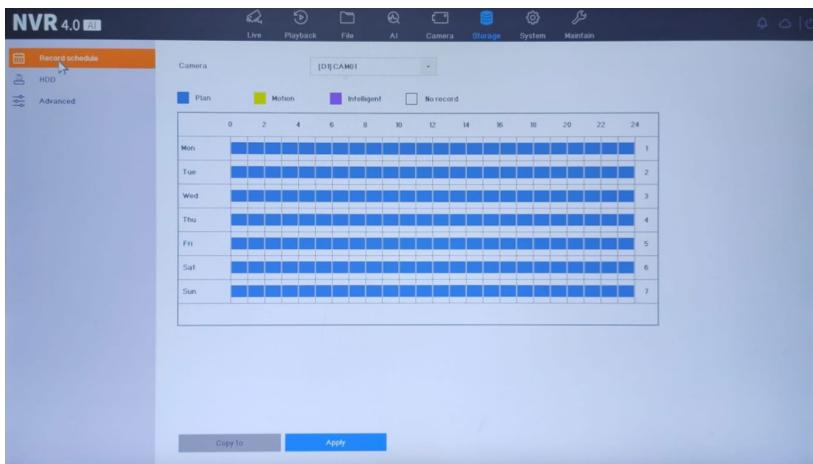

2. "Display" - This submenu provides access to the management part of:  
Displaying the name and date for each individual room; Color settings for each individual channel; Lighting settings for each individual room. (if available)
3. "Privacy mask" - This submenu provides access to the image mask management part;
4. Codec settings - This submenu provides access to the management part of the video coding part: Main stream and sub stream. (if available)
5. "Audio" - This submenu provides access to the management part of the sound taken from the camera (if available)
6. "PTZ" - This submenu provides access to the management part of the camera movement (if available)
7. "Upgrade from Cloud" - This submenu provides access to the management part of the firmware update on the server (if available)

## Storage menu

This menu allows access to 3 submenus with recording settings:

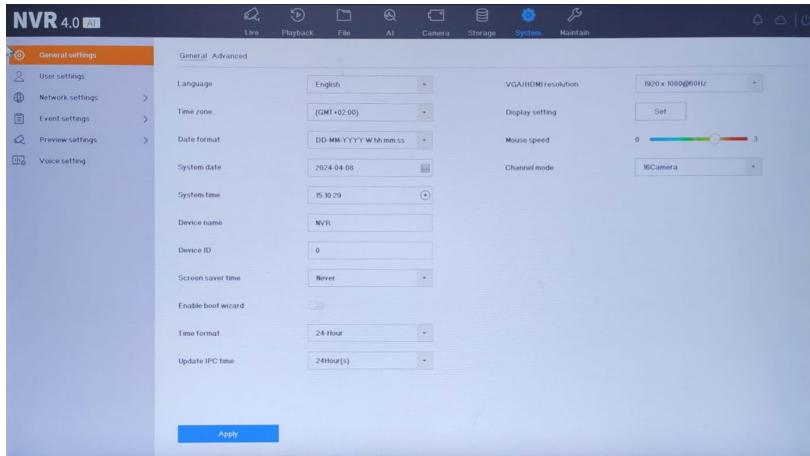

1. "Record schedule" - this submenu allows configuring the recording schedule for each channel/camera separately: planned, motion detection, smart or off;
2. "HDD" - this submenu allows displaying the status of the internal storage unit: total space, remaining space, estimated recording time, etc.
3. "Advanced" – this submenu allows advanced settings on the storage/recording side.

## System menu

This menu allows access to 6 submenus with system settings:

1. "General settings" - here we find general and advanced system settings such as: Language, date, name, ID, number of cameras, output resolution, etc.

1. "User settings" - this submenu allows editing/creating/managing users and passwords that access the system

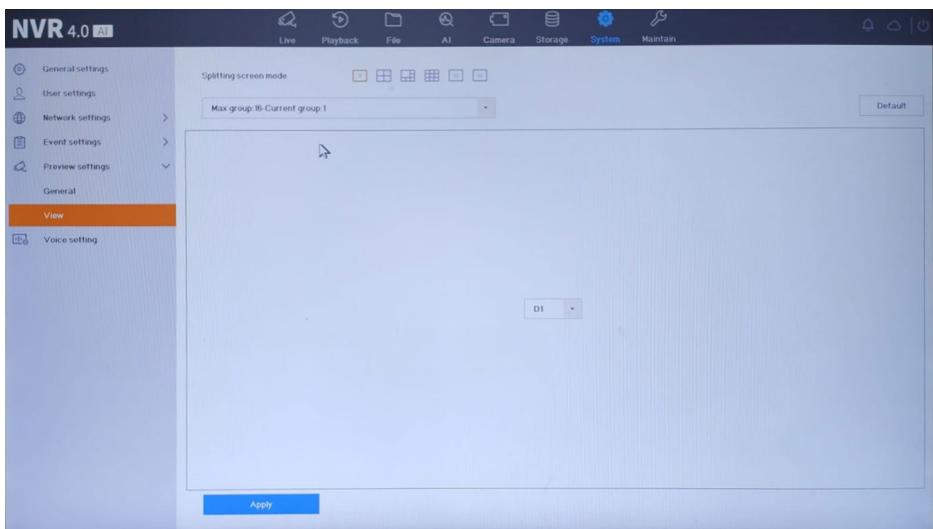

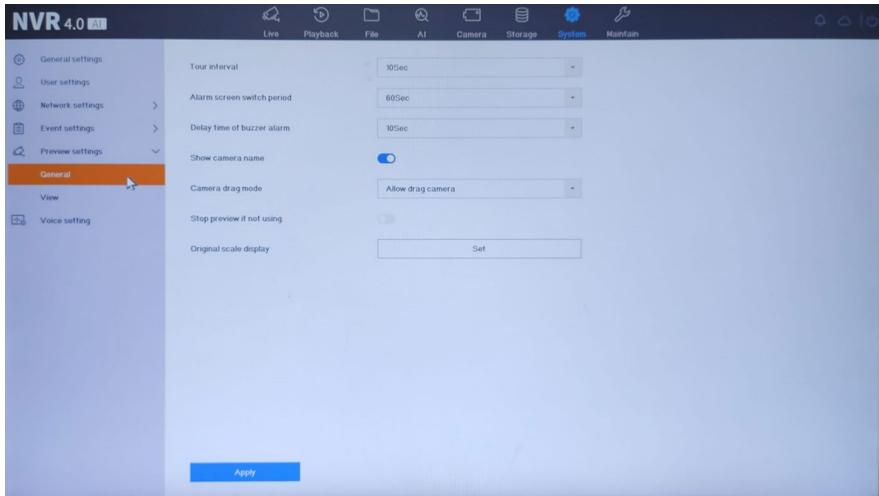

NO.	User name	Type	Authority
1	admin	Administrator	1
2	Default	Default	0

- "Network settings" - this submenu allows configuring general and advanced network/server/DID series and mobile application settings.

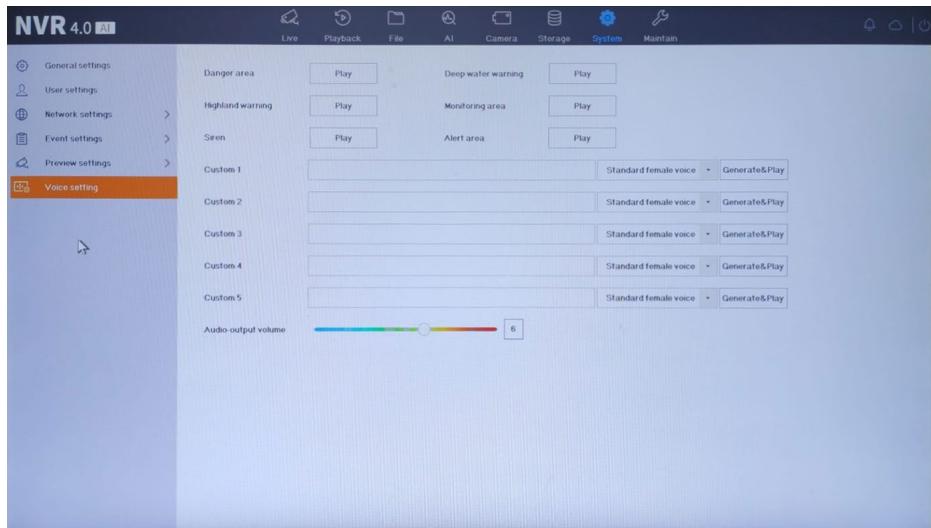

The screenshot shows the 'Network settings' page of the NVR 4.0 software. The left sidebar has a 'Network settings' item selected. The main area displays network configuration options under 'TCP/IP & NTP'. It includes fields for Network interface (10M/100M), DHCP (IPv4) status, Auto obtain DNS, Primary DNS (223.5.5.5), Secondary DNS (223.6.6.6), and static IP details (IPV4 address: 192.168.1.9, subnet mask: 255.255.255.0, gateway: 192.168.1.1). A MAC address is also listed as 5a:5a:00:35:fa:23. There is a checkbox for 'Share cellphone's internet'. At the bottom is an 'Apply' button.

The screenshot shows the 'Add/Scan' page of the NVR 4.0 software. The left sidebar has an 'Add/Scan' item selected. The main area shows a 'Cloud service' section with 'Email' set to 'Gmail/IMAP'. Below it is a 'DID' field containing '107DCC-172559-WY/KKV'. The status is shown as 'Network blocked'. Two QR codes are displayed: one for 'Using APP scan QR code to add NVR' and another for 'Using cellphone to scan and download APP'.

1. "Event settings" - here we find the event settings part available depending on the equipment level of the surveillance cameras.
2. "Preview settings" - we find settings for displaying images, alarms, audio notifications and camera groups.

1. "Voice setting" – this sub-menu allows configuring the audio alerts that the NVR can transmit on the audio output.

## Maintain menu

This menu allows access to 7 submenus with information about the system and administrative settings:

1. "Information" - contains information about system status, camera status, recording status, network status, storage media status (HDD), connected users, installation.
2. "Log" - here we find a historical log with all the events and system changes made in the past.
3. "Upgrade" - here we find the device software update option
4. "Restore" - here we have the options of simple or advanced reset of the system to factory settings
5. "Network detection" - Here we find diagnostic options for network connection status, network communication times and internet connection check.

The screenshot shows the NVR 4.0 AI software interface. At the top, there are tabs for Live, Playback, File, AI, Camera, Storage, System, and **Maintain**. On the left, a sidebar menu includes Information, Log, Profile, Upgrade, Restore, Network detection (with a dropdown), Network flow, Ping tool, Service test (which is selected and highlighted in orange), and Maintenance. The main area is titled "Check" and displays a table of service status. The table has columns for Service, Status, and Reason.

Service	Status	Reason
Network status	Normal	Good connection
Gateway	Normal	Connected
Primary DNS	Normal	Connected
E-mail	Disable	---
Cloud service	Normal	Internet ready, support alarm notifications
Upgrade from cloud	Normal	Connected
Share cellphone's internet	Disable	---

1. 1. "Maintenance" - This sub-menu allows regular maintenance - scheduled restart of the system once at a certain set period of time.

## Технически спецификации

Брой канали	4 / 8 / 10 / 16 IP
Резолюция за регистрация	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Резолюция на възпроизвеждане	Макс. 4K на HDMI изход Макс. 1080P на VGA изход Макс. 16Ch, поддържа двоен поток
Видео изходи	1 x VGA / 1 x HDMI
Аудио изход	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Видео компресия	H.264 / H.265
Аудио компресия	G.711U G.711A G.726
Режими на регистрация	Ръчно, интелигентно, засичане на движение, по график
HDD	1 x HDD SATA (макс. 8TB), не е включен
Протокол на камерата	P6S, ONVIF
Захранване	12V / 2A
Консумация	<15W (без HDD)
Размери	255 x 210 x 40 mm

### Основни функции

- Едновременен запис в реално време на няколко канала, дистанционно възпроизвеждане и конфигуриране от PC и Smartphone приложения.
- Едновременен видео изход на VGA и HDMI.
- Архивиране на USB памет и външен HDD.
- Поддържа разпознаване на човешка форма и PTZ контрол (в зависимост от камерата)
- Възможност за свързване на външен микрофон и външен високоговорител.
- Интелигентни AI функции

# Technische Spezifikationen

Anzahl der Kanäle	4 / 8 / 10 / 16 IP
Registrierungsauflösung	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Wiedergabeauflösung	Max. 4K am HDMI-Ausgang Max. 1080P am VGA-Ausgang Max. 16Ch, unterstützt Dual-Stream
Videoausgänge	1 x VGA / 1 x HDMI
Audioausgang	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Video-Kompression	H.264 / H.265
audiokomprimierung	G.711U G.711A G.726
Registrierungsmodi	Manuell, intelligent, Bewegungserkennung, geplant
Festplatte	1 x HDD SATA (max. 8 TB), nicht im Lieferumfang enthalten
Kameraprotokoll	P6S, ONVIF
Stromversorgung	12V / 2A
Verbrauch	<15 W (ohne Festplatte)
Maße	255 x 210 x 40 mm

## Hauptfunktionen

- Gleichzeitige Aufnahme in Echtzeit auf mehreren Kanälen, Fernwiedergabe und Konfiguration über PC- und Smartphone-Anwendungen.
- Gleichzeitige Videoausgabe auf VGA und HDMI.
- Backup auf USB-Stick und externer Festplatte.
- Unterstützt die Erkennung menschlicher Formen und die PTZ-Steuerung (je nach Kamera)
- Möglichkeit zum Anschluss eines externen Mikrofons und eines externen Lautsprechers.
- Intelligente KI-Funktionen

## Especificaciones técnicas

Número de canales	4 / 8 / 10 / 16 IP
Resolución de registro	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Resolución de reproducción	Máx. 4K en salida HDMI Máx. 1080P en salida VGA Máx. 16 canales, admite transmisión dual
Salidas de vídeo	1 x VGA / 1 x HDMI
Salida de audio	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Compresión de video	H.264 / H.265
Compresión de audio	G.711U G.711A G.726
Modos de registro	Manual, inteligente, detección de movimiento, programada
disco duro	1 x HDD SATA (máx. 8 TB), no incluido
Protocolo de cámara	P6S, ONVIF
Fuente de alimentación	12V / 2A
Consumo	<15W (sin el disco duro)
Dimensiones	255 x 210 x 40 mm

## Funciones principales

- Grabación simultánea en tiempo real en varios canales, reproducción remota y configuración desde aplicaciones de PC y Smartphone.
- Salida de vídeo simultánea en VGA y HDMI.
- Copia de seguridad en memoria USB y disco duro externo.
- Admite detección de forma humana y control PTZ (dependiendo de la cámara)
- Posibilidad de conectar un micrófono externo y un altavoz externo.
- Funciones inteligentes de IA

# Spécifications techniques

Nombre de canaux	4 / 8 / 10 / 16 IP
Résolution d'inscription	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Résolution de lecture	Max. 4K sur sortie HDMI Max. 1080P sur sortie VGA Max. 16Ch, prend en charge le double flux
Sorties vidéo	1 x VGA / 1 x HDMI
Sortie audio	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Compression de vidéo	H.264 / H.265
Compression audio	G.711U G.711A G.726
Modes d'inscription	Manuel, intelligent, détection de mouvement, programmé
Disque dur	1 x disque dur SATA (max. 8 To), non inclus
Protocole de caméra	P6S, ONVIF
Source de courant	12V/2A
Consommation	<15W (sans le disque dur)
Dimensions	255 x 210 x 40 mm

## Fonctions principales

- Enregistrement simultané en temps réel sur plusieurs canaux, lecture et configuration à distance depuis les applications PC et Smartphone.
- Sortie vidéo simultanée sur VGA et HDMI.
- Sauvegarde sur clé USB et disque dur externe.
- Prend en charge la détection de forme humaine et le contrôle PTZ (en fonction de la caméra)
- Possibilité de connecter un microphone externe et un haut-parleur externe.
- Fonctions d'IA intelligentes

## Műszaki adatok

Csatornák száma	4 / 8 / 10 / 16 IP
Regisztrációs határozat	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Lejátszási felbontás	Max. 4K HDMI kimeneten Max. 1080P VGA kimeneten Max. 16 csatornás, támogatja a dual streamet
Videó kimenetek	1 x VGA / 1 x HDMI
Hang kimenet	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Videó tömörítés	H.264 / H.265
Hangtömörítés	G.711U G.711A G.726
Regisztrációs módok	Manuális, intelligens, mozgásérzékelés, ütemezett
HDD	1 x HDD SATA (max. 8 TB), nem tartozék
Kamera protokoll	P6S, ONVIF
Tápegység	12V / 2A
Fogyasztás	<15W (HDD nélkül)
Méretek	255 x 210 x 40 mm

## Fő funkciók

- Egyidejű, valós idejű rögzítés több csatornán, távoli lejátszás és konfiguráció PC és okostelefon alkalmazásokból.
- Egyidejű videokimenet VGA-n és HDMI-n.
- Biztonsági mentés USB pendrive-ra és külső merevlemezre.
- Támogatja az emberi alak felismerését és a PTZ vezérlést (a kamerától függően)
- Lehetőség külső mikrofon és külső hangszóró csatlakoztatására.
- Intelligens AI-funkciók

## Specifiche tecniche

Numero di canali	4 / 8 / 10 / 16 IP
Risoluzione della registrazione	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Risoluzione della riproduzione	Massimo. 4K su uscita HDMI Massimo. 1080P sull'uscita VGA Massimo. 16 canali, supporta il doppio flusso
Uscite video	1 x VGA / 1 x HDMI
Uscita audio	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Compressione video	H.264 / H.265
Compressione audio	G.711U G.711A G.726
Modalità di registrazione	Manuale, intelligente, rilevamento del movimento, programmato
HDD	1 HDD SATA (max. 8TB), non incluso
Protocollo della fotocamera	P6S, ONVIF
Alimentazione elettrica	12V/2A
Consumo	<15 W (senza disco rigido)
Dimensioni	255 x 210 x 40 mm

## Funzioni principali

- Registrazione simultanea in tempo reale su più canali, riproduzione remota e configurazione da applicazioni PC e Smartphone.
- Uscita video simultanea su VGA e HDMI.
- Backup su chiavetta USB e HDD esterno.
- Supporta il rilevamento della forma umana e il controllo PTZ (a seconda della telecamera)
- Possibilità di collegare un microfono esterno e un altoparlante esterno.
- Funzioni AI intelligenti

## Technische specificaties

Aantal kanalen	4 / 8 / 10 / 16 IP
Registratie resolutie	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Afspeelresolutie	Max. 4K op HDMI-uitgang Max. 1080P op VGA-uitgang Max. 16-kanaals, ondersteunt dubbele stream
Video-uitgangen	1 x VGA / 1 x HDMI
Audio uitgang	1 x jack 3.5"
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Video compressie	H.264 / H.265
audiocompressie	G.711U G.711A G.726
Registratiemodi	Handmatig, intelligent, bewegingsdetectie, gepland
HDD	1 x HDD SATA (max. 8TB), niet inbegrepen
Cameraprotoocol	P6S, ONVIF
Stroomvoorziening	12V / 2A
Consumptie	<15W (zonder de HDD)
Dimensies	255 x 210 x 40 mm

### Hoofdfuncties

- Gelijktijdige opname in realtime op meerdere kanalen, afspelen op afstand en configuratie vanaf pc- en smartphone-applicaties.
- Gelijktijdige video-uitvoer op VGA en HDMI.
- Back-up op USB-stick en externe HDD.
- Ondersteunt menselijke vormdetectie en PTZ-besturing (afhankelijk van de camera)
- Mogelijkheid tot aansluiting van een externe microfoon en externe luidspreker.
- Intelligent AI-functies

## Specyfikacja techniczna

Liczba kanałów	4 / 8 / 10 / 16 IP
Uchwała rejestracyjna	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Rozdzielcość odtwarzania	Maks. 4K na wyjściu HDMI Maks. 1080P na wyjściu VGA Maks. 16 kanałów, obsługuje podwójny strumień
Wyjścia wideo	1 x VGA / 1 x HDMI
Wyjście audio	1 x jack 3.5"
Ethernetu	1 x RJ45 10/100Mbps
USB	2 x USB2.0
Kompresja wideo	H.264 / H.265
Kompresja dźwięku	G.711U G.711A G.726
Tryby rejestracji	Ręczny, inteligentny, wykrywanie ruchu, zaplanowany
dysk twardy	1 x dysk twardy SATA (maks. 8 TB), brak w zestawie
Protokół kamery	P6S, ONVIF
Zasilacz	12 V / 2 A
Konsumpcja	<15 W (bez dysku twardego)
Wymiary	255 x 210 x 40 mm

### Główne funkcje

- Jednoczesne nagrywanie w czasie rzeczywistym na kilku kanałach, zdalne odtwarzanie i konfiguracja z aplikacji na PC i Smartfonie.
- Jednoczesne wyjście wideo na VGA i HDMI.
- Kopia zapasowa na pamięci USB i zewnętrznym dysku twardym.
- Obsługuje wykrywanie ludzkich kształtów i sterowanie PTZ (w zależności od kamery)
- Możliwość podłączenia zewnętrznego mikrofonu i zewnętrznego głośnika.
- Inteligentne funkcje AI

## Functii principale

- Inregistrare simultana in timp real pe mai multe canale, redare si configurare de la distanta din aplicatii de PC si Smartphone.
- Iesire video simultana pe VGA si HDMI.
- Backup pe stick USB si HDD extern.
- Suporta detectie forma umana si control PTZ (in functie de camera)
- Posibilitate conectare microfon extern si difuzor extern.
- Functii inteligente AI
  - E-fence – legatura push, ecran mare, alarma vocala NVR si alte functii de alarma (functie disponibila doar cu camera compatibila)
  - Line-crossing - legatura push, ecran mare, alarma vocala NVR si alte functii de alarma (functie disponibila doar cu camera compatibila)
  - Duty-off detection - legatura push, ecran mare, alarma vocala NVR si alte functii de alarma (functie disponibila doar cu camera compatibila)
  - Passenger flow statistics - suporta interogarea fluxului de pasageri (functie disponibila doar cu camera compatibila)
  - AI playback - Suporta redarea umana AI, etc la care redarea este mai precisa.

## Specificatii tehnice

Numar canale	4 / 8 / 10 / 16 IP
Rezolutie inregistrare	16Ch x 5MP 10Ch x 4K 8 Ch x 4K / 4 CH x 4K
Rezolutie de redare	Max. 4K pe iesirea HDMI Max. 1080P pe iesirea VGA Max. 16Ch , suporta dual stream
Iesiri video	1 x VGA / 1 x HDMI
Iesire audio	1 x jack 3.5”
Ethernet	1 x RJ45 10/100Mbps
USB	2 x USB2.0

Compresie video	H.264 / H.265
Compresie audio	G.711U G.711A G.726
Moduri inregistrare	Manual, intelligent, detectie miscare,
HDD	1 x HDD SATA (maxim 8TB), nu este inclus
Protocol camere	P6S, ONVIF
Alimentare	12V / 2A
Consum	<15W (fara HDD)
Dimensiuni	255 x 210 x 40 mm
Temperatura de lucru	-26°C ~ +80°C

## Instructiuni de utilizare

### Instalarea unitatii de stocare

Inainte de prima utilizare, va rugam sa instalati unitatea de stocare.

In carcasa unitatii de inregistrare poate fi instalat un hard disk-uri SATA cu o capacitate maxima de 8TB (HDD-ul nu este inclus in pachet).

- Desfaceti suruburile si scoateti capacul DVR-ului
- Conectati cablurile de date si fixati hard disk-ul in suruburile din interior
- Puneti capacul DVR-ului la loc
- Conectati la DVR cablul de alimentare, de internet, mouse-ul si monitorul

### Pornirea dispozitivului

Introduceti cablul de alimentare intr-o priza 230V. DVR-ul va porni. LED-ul „PWR” indicator se va aprinde verde.

Pe ecran va aparea Ghidul rapid de configurare care va ajuta sa faceti setari rapide ale sistemului pentru functionare minimala.

#### Note:

1. Verificati daca tensiunea de intrare corespunde cu tensiunea recomandata a dispozitivului. Tensiunea de alimentare este de  $230V \pm 10\% / 50\text{ Hz}$  2A.
2. Va sugeram sa folositi un dispozitiv UPS pentru a proteja dispozitivul de variatiile de tensiune si pentru o autonomie pe perioada intreruperilor scurte de curent de la furnizor.

Atentie: variatiile de tensiune din retea cauzate de descarcarile electrice,

supratensiuni etc pot duce la defectarea sursei de alimentare defect ce nu este acoperit de garantie.

## Oprirea dispozitivului

Sunt doua metode de oprire a dispozitivului.

1. Recomandat: Apasati butonul „Power” din colțul dreapta sus și selectați opțiunea „Shutdown” (Inchidere)
2. Oprită sursa de alimentare.

## Controlul de la distanță al dispozitivului

DVR-ul poate fi controlat local sau de la distanță atât de pe smartphone cât și de pe computere cu sistem de operare Windows.

Aplicații compatibile: P6Slite (Android/iOS), EasyVMS (Windows)

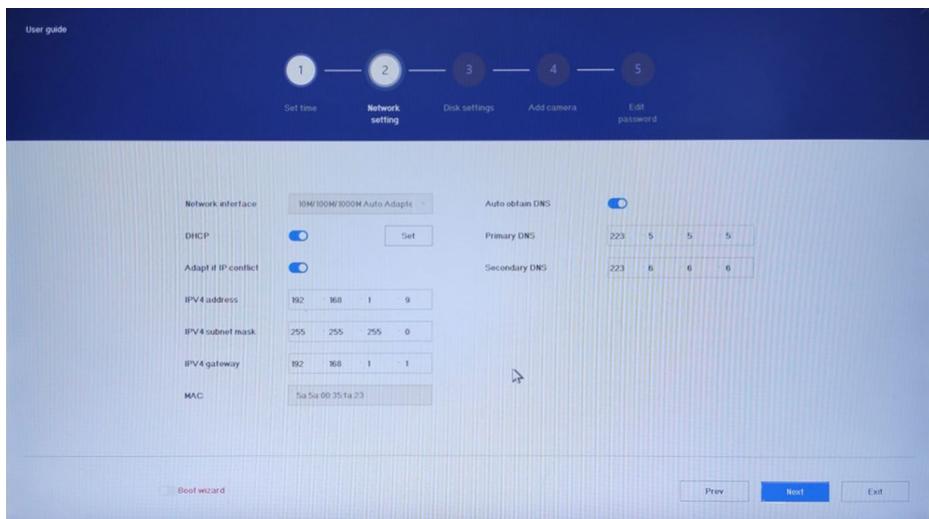

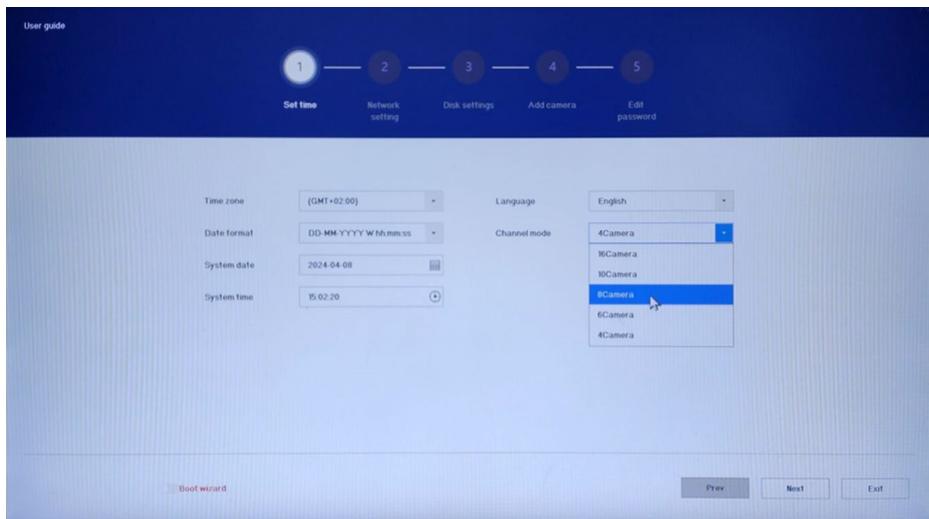

## Ghid rapid de configurare

După pornirea dispozitivului va porni ghidul de configurare rapidă.

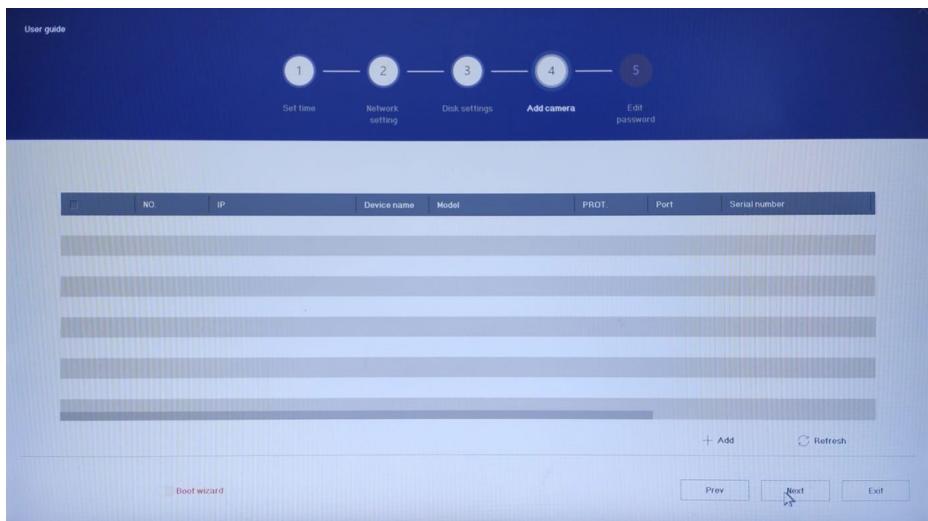

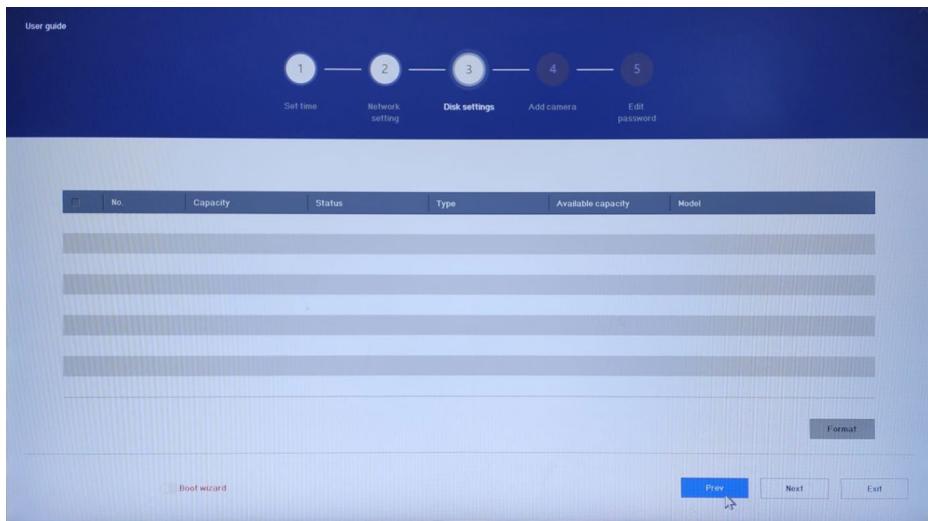

Nota: Recomandăm configurarea sistemului înainte de instalarea DVR-ului și a camerelor în locația finală.

Pasii urmati din ghidul rapid de instalare:

1. Setați ora, data, fusul orar, limba și numărul de camere de instalat.
2. Verificați/modificați setările de rețea în funcție de rețea dumneavoastră, sau bifati DHCP, Adapt if IP conflict și Auto-obtain DNS pentru a prelua setări automate din router.

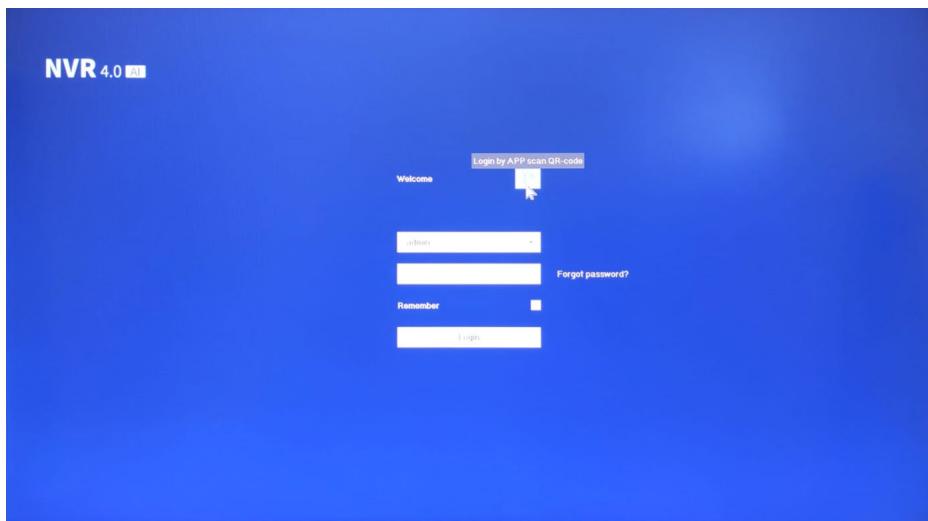

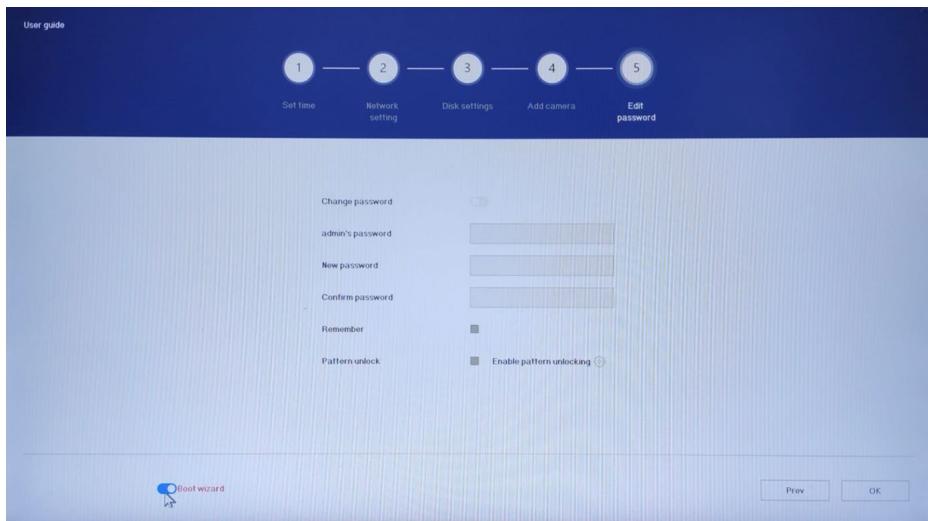

3. Daca ati instalat o unitate de stocare(Hdd) in NVR in acest meniu va aparea modelul si capacitatea ( recomandam doar dispozitive dedicate pentru sisteme de supraveghere si pentru functionare 24/7)
4. Acest meniu este dedicat adaugarii de camere cu IP conectate ( si alimentate confirm indicatiilor) in aceeasi retea cu NVR-ul. Aici puteti actualiza si/sau adauga lista de camere din aceeasi retea.

5. Acest ultim pas al ghidului rapid va solicita sa schimbati parola de fabrica a NVR-ului cu una privata proprie. Aceasta trebuie sa fie din 8-16 caractere, minim o litera cu majuscule si minim o cifra. Din acest meniu puteti deasemeni activa o parola de tip desen.

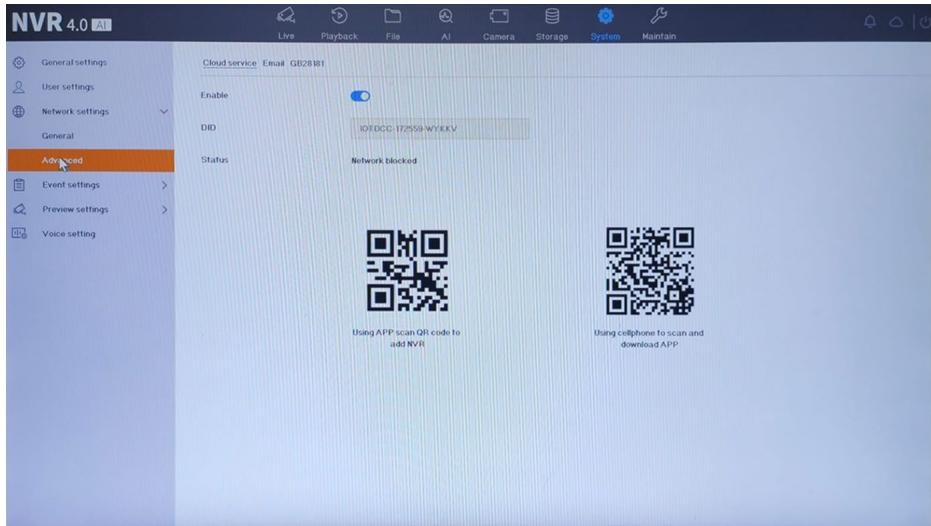

***Nota: Pentru siguranta sistemului Dvs., recomandam schimbarea parolei dupa prima autentificare in sistem si notarea acestei parole separat intr-o agenda sau loc sigur pentru a evita uitarea ei.***

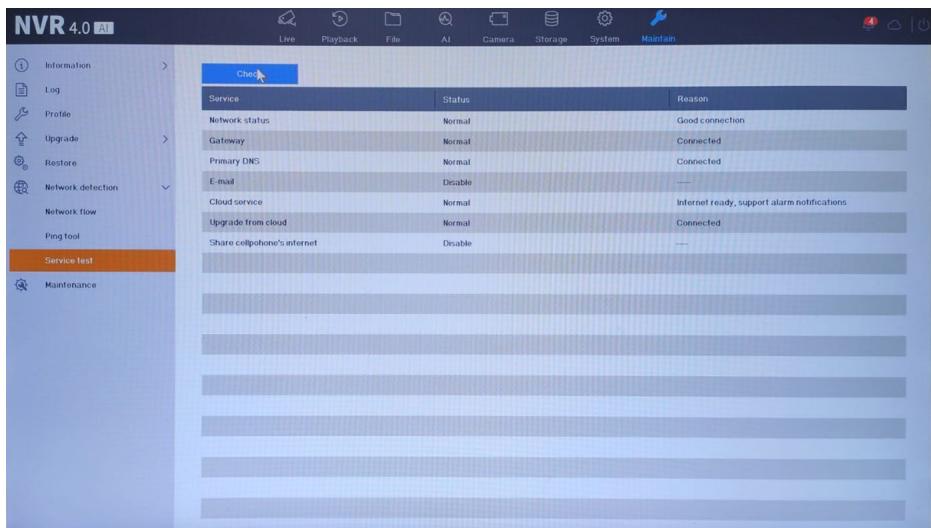

## Test retea

Pentru verificarea conexiunii la retea/server puteti verifica in 2 moduri:

1. System/Network settings / Advanced unde in submeniul Status veti gasi:
  - Internet ready, suport alarm notifications – Conexiune la internet reusita;
  - „Network blocked” – Retea/internet indisponibila

2. Maintain/Network detection unde aveti cateva instrumente de verificare stare conexiune la reteaua locala, la internet si la server.

In cazul in care mesajul afiseaza varianta „Network blocked” sau „Connect failed” verificati:

- cablul de retea - functionalitate
- portul din router/switch in care ati introdus cablul daca are acces la internet
- daca setarile de retea din meniul System/Network settings/General sunt corecte.
- Bifati „DHCP”, „Adapt if IP conflict” si „Auto obtain DNS” , aplicati setarile si verificati din nou Starea conexiunii.

## Descriere meniu principal

### Meniu Live

Acum meniu permite 2 actiuni principale

1. „Camera” - Vizualizarea in timp real a imaginilor transmise de camere in functie de necesitate: 1/4/9/10/16 canale, ecran complet sau micsorat, navigarea intre camere. Tot aici se pot efectua setari pe control inregistrare.

2. „Event” – Cautarea si accesarea listei de evenimente inregistrate in functie de setarile AI facute in meniul dedicat: detectie humanoid, electronic fence,

## Cross-boundary, Off-duty detection

Ca si functii secundare pe fiecare canal in parte regasim: „Quick playback”, „PTZ Control”, „Zoom”, „Sound control”, „Camera information”, „Sunet bidirectional”, „Snapshot”, „Camera information”

## Meniu Playback

Acest meniu permite 2 actiuni principale

1. „Common playback” – Acum meniu permite redarea clasica a inregistrarilor in functie de cautarile efectuate dupa camera si data: An, Luna, saptamana, zi

2. „Smart playback” – Acest meniu permite cautarea si redarea inteligenta a inregistrarilor in functie de cautarile efectuate dupa camera si tip de eveniment: Motion event, Humanoid event, Electronic fence, Cross-boundary, Off-duty detection, Passenger flow

Pe langa aceste actiuni principale avem si actiuni secundare de redare/navigare pe clipurile video selectate.

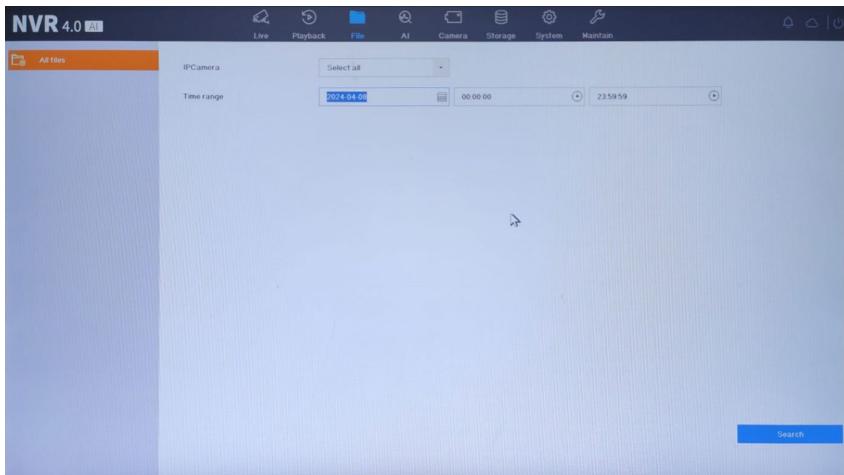

O alta functie importanta ce se regaseste in acest meniu este cea de „Backup” – salvare inregistrari pe suport de stocare extern ( Stick sau Hdd extern USB)

## Meniu File

Acest meniu permite cautarea inregistrarilor video / pozelor dupa perioada selectata : Data inceput – Data sfarsit.

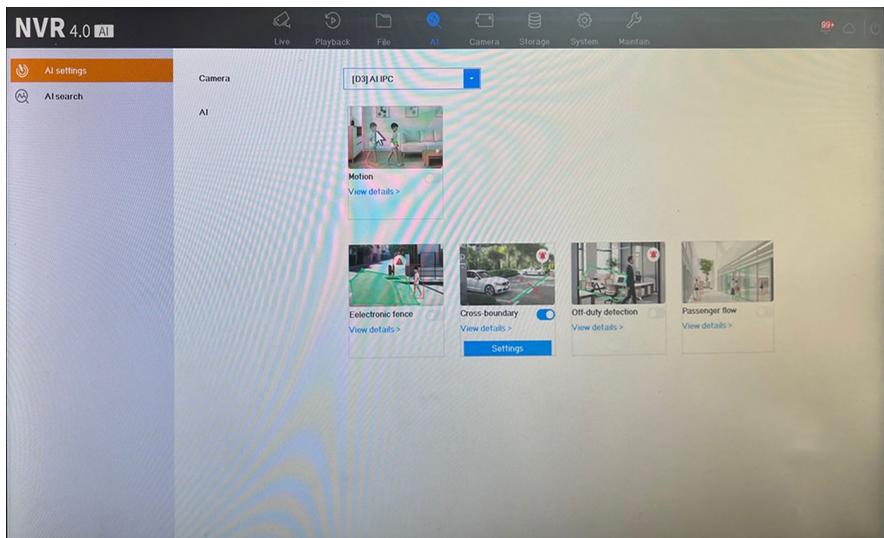

Si acest meniu permite salvarea inregistrarilor selectate pe suport de stocare extern.

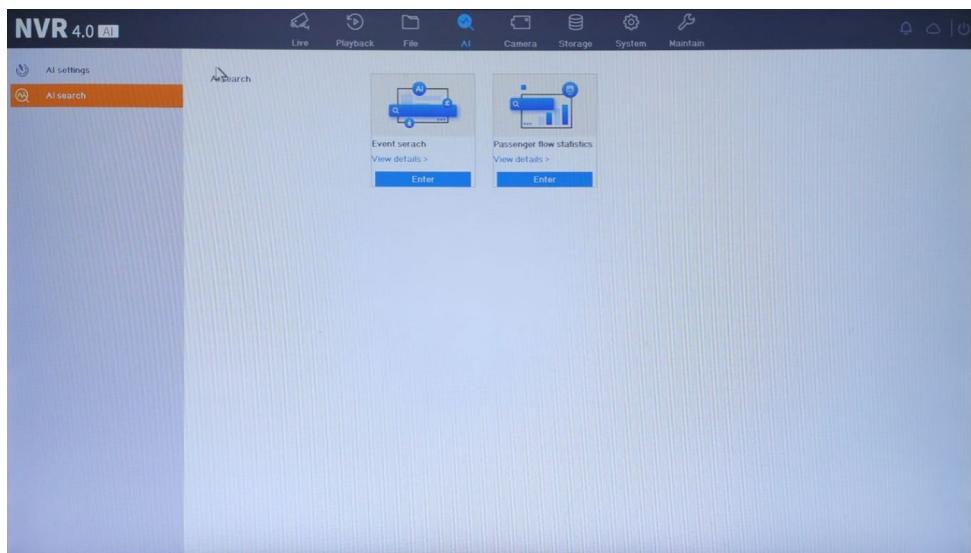

## Meniu AI

Acest meniu permite 2 actiuni principale

1. „AI settings” – Acest meniu permite efectuarea setarilor de actiune la diferitele tipuri de evenimente AI ( doar daca acea camera suporta aceste functii)

2. „AI search” – Acest meniu permite efectuarea de cautari avansate in functie de evenimentele AI

## Meniu Camera

Acest meniu permite accesul a 7 submeniuri cu setari ale camerelor:

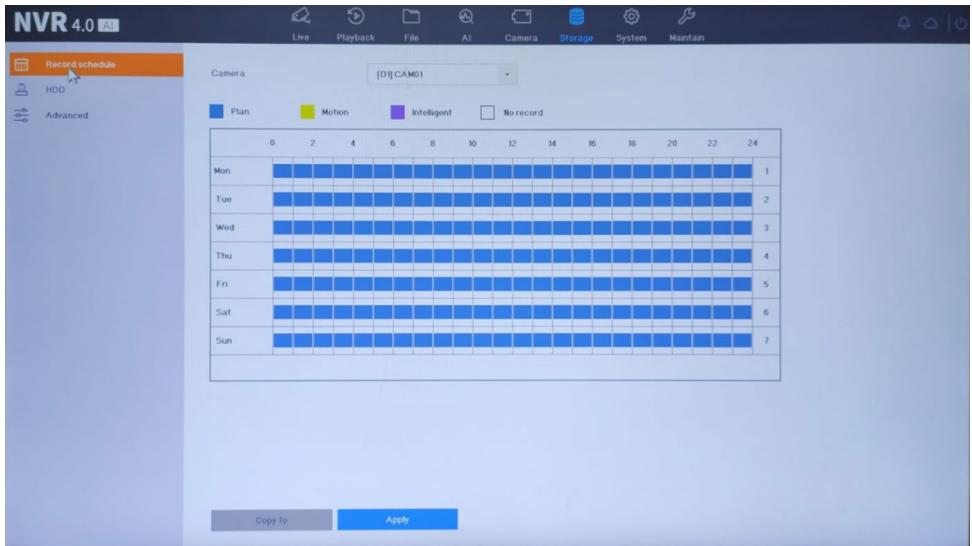

1. „Camera” – Acest submeniu ofera acces la partea de gestiune camere IPC: Adaugare, configurare, stergere, etc. ( daca este disponibila)
2. „Display” – Acest submeniu ofera acces la partea de gestiune a: Afisarii numelui si datei pentur fiecare camera in parte; Setarii culorilor pentru fiecare canal in parte; Setarii de iluminare pentru fiecare camera in parte. ( daca este disponibila)
3. „Privacy mask” - Acest submeniu ofera acces la partea de gestiune a mascarii imaginii;
4. Codec settings - Acest submeniu ofera acces la partea de gestiune a partii de codare video: Main stream si sub stream. ( daca este disponibila)
5. „Audio” - Acest submeniu ofera acces la partea de gestiune a sunetului

- preluat de la camera( daca este disponibila)
6. „PTZ” - Acest submeniu ofera acces la partea de gestiune a miscarii camerei ( daca este disponibila)
  7. „Upgrade from Cloud” - Acest submeniu ofera acces la partea de gestiune a actualizarii firmware de pe server ( daca este disponibila)

## Meniu Storage

Acest meniu permite accesul la 3 submeniuri cu setari de inregistrare:

1. „Record schedule” – acest submeniu permite configurarea programului de inregistrare pentru fiecare canal/camera in parte: planificat, la detectie miscare, inteligent sau oprit;
2. „HDD” – acest submeniu permite afisarea starii unitatii interne de stocare: spatiu total, spatiu ramas, timp estimativ de inregistrare, etc.
3. „Advanced” – acest submeniu permite setari avansate pe partea de stocare/inregistrare.

## Meniu System

Acest meniu permite accesul la 6 submeniuri cu setari de sistem:

1. „General settings” – aici gasim setari generale si avansate ale sistemului cum ar fi: Limba, data, nume, ID, numar camere, rezolutie de iesire, etc.

The screenshot shows the 'General settings' page of the NVR 4.0 AI software. The left sidebar has 'User settings' selected. The main area contains various configuration options:

- Language: English
- VGA/HDMI resolution: 1920 x 1080@60Hz
- Time zone: (GMT+02:00)
- Date format: DD-MM-YYYY W hh:mm:ss
- Display setting: Set
- System date: 2024-04-08
- Mouse speed: 0 to 3
- System time: 15:10:29
- Channel mode: 16Camera
- Device name: NVR
- Device ID: 0
- Screen saver time: Never
- Enable boot wizard: Off
- Time format: 24-Hour
- Update IPC time: 24Hour(s)

A blue 'Apply' button is at the bottom.

2. „User settings” – acest submeniu permite editarea/crearea/gestiunea utilizatorilor si a parolelor care acceseaza sistemul

The screenshot shows the 'User settings' page of the NVR 4.0 AI software. The left sidebar has 'User settings' selected. The main area displays a table of users:

NO	User name	Type	Authority
1	admin	Administrator	●
2	Default	Default	●

3. „Network settings” – acest submeniu permite configurarea setarilor generale si avansate de retea/server/serie DID si aplicatie de mobil.

NVR 4.0 AI

**Cloud service** Email: GB26181

Enable:

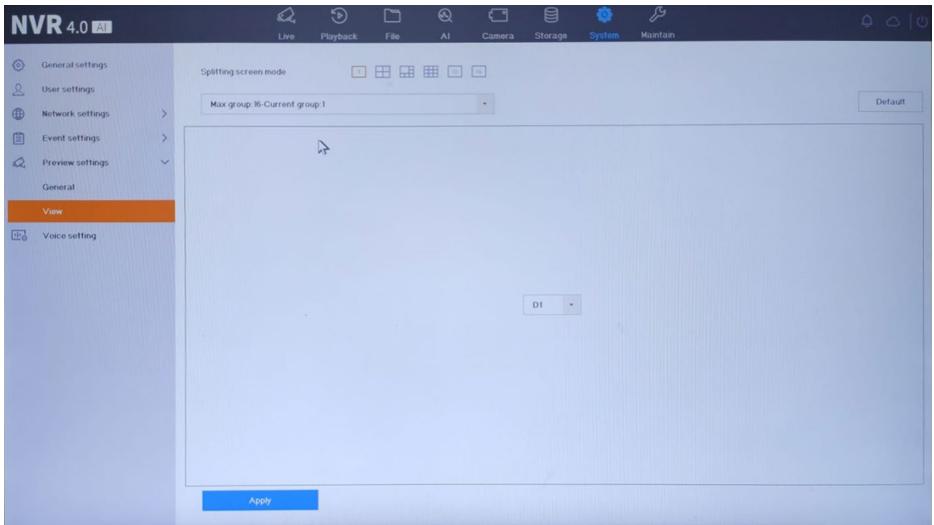

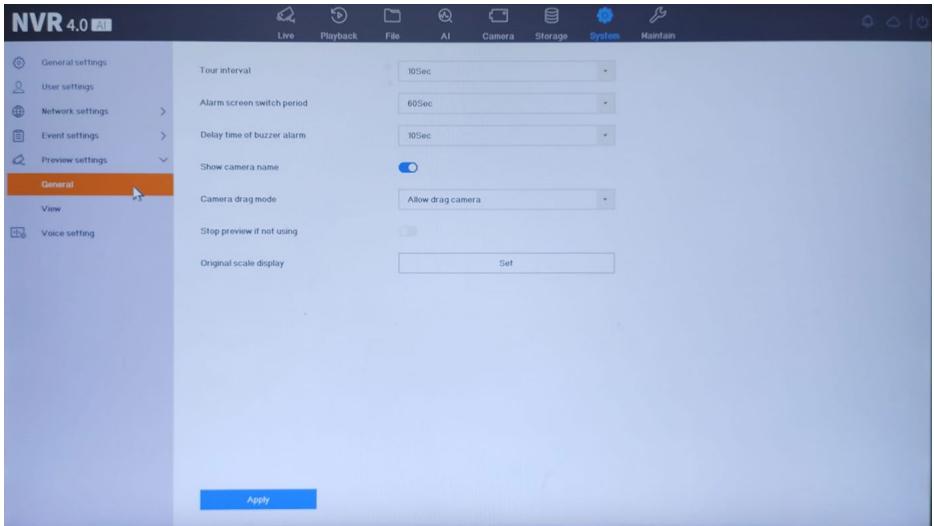

DID: IOT.DCC-172559-WYKKV

Status: Network blocked

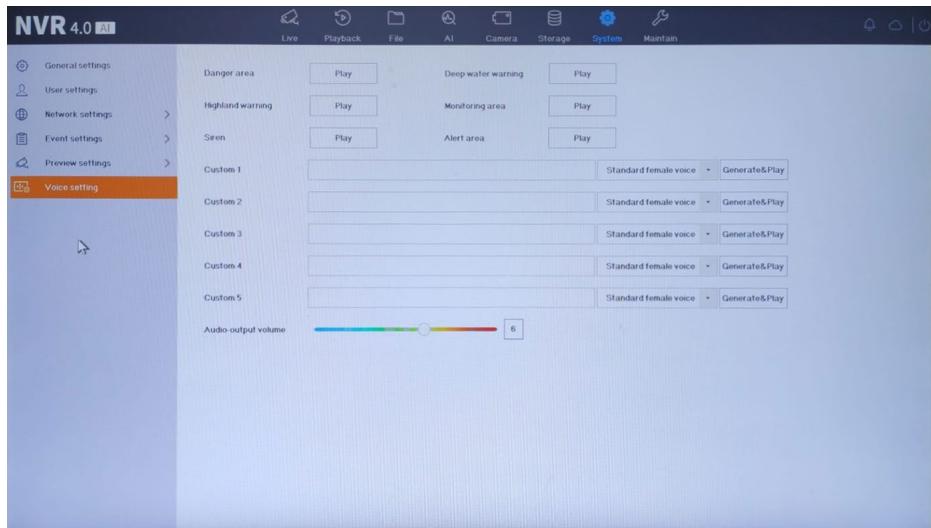

Using APP scan QR code to add NVR

Using cellphone to scan and download APP

4. „Event settings” – aici regasim partea de setari evenimente disponibila in functie de nivelul de echipare al camerelor de supraveghere.
5. „Preview settings” – regasim setari de afisare a imaginilor , a alarmelor, a notificarilor audio si a grupurilor de camere.

6. „Voice setting” – acest submeniu permite configurarea alertelor audio pe care NVR-ul le poate transmite pe iesirea audio.

## Meniu Maintain

Acest meniu permite accesul la 7 submeniuri cu informatii despre sistem si setari administrative:

1. „Information” – contine informatii despre stare sistem, stare camere, stare inregistrari, stare retea, stare suport de stocare(HDD), utilizatori conectati, instalare.
2. „Log” – aici regasim un jurnal istoric cu toate evenimentele si modificarile de sistem efectuate in trecut.
3. „Upgrade” – aici regasim optiunea de actualizare software dispozitiv
4. „Restore” – aici avem optiunile de resetare simpla sau avansata a sistemului la setarile de fabrica
5. „Network detection” – Aici regasim optiuni de diagnosticare stare conexiune retea, timpi de comunicare in retea si verificare conexiune la internet.

The screenshot shows the NVR 4.0 software interface. The top navigation bar includes icons for Live, Playback, File, AI, Camera, Storage, System, and Maintain. The 'Maintain' tab is selected. On the left, a sidebar menu lists: Information, Log, Profile, Upgrade, Restore, Network detection (with Network flow and Ping tool), Service test (which is highlighted in orange), and Maintenance. The main content area is titled 'Check' and displays a table of service status:

Service	Status	Reason
Network status	Normal	Good connection
Gateway	Normal	Connected
Primary DNS	Normal	Connected
E-mail	Disable	---
Cloud service	Normal	Internet ready, support alarm notifications
Upgrade from cloud	Normal	Connected
Share cellphone's internet	Disable	---

6. „Maintenance” – Acest submeniu permite o mentenanță regulată – repornire programată a sistemului odată la o anumită perioadă setată de timp.
